

WINE SECTION

The Benefits

1. Multi-purpose section

- Fits all major bottle types used by the wine industry.
- Reduces working capital associated with holding stock of multiple case and section variants.

2. Reduces packing time when bottling

- Sections are designed to be simply inserted into cases without any further assembly.
- Designed to be hand or machine inserted into cases.
- Sections are easy to handle, due to the interlocking design.

3. Prevents damage to wine bottles and labels

- Cardboard fibreboard provides the necessary cushioning to protect wine bottles and labels from any unnecessary scuffing.

4. Wine sections are supplied by the pallet on demand

- Reduces order lead-time from placement of order to delivery.
- Industry benefits through the economies of scale of mass production.

Technical Specifications

Size:	See table on reverse
Material:	Corrugated fibreboard
Style:	Laced stand-up section
Other Features:	Lightweight, disposable

Product is available from Carter Holt Harvey Packaging in full pallet quantities. Alternatively, smaller lot sizes are now available from Packaging House.

Our innovative sections were developed for the major wine exporters. Now they're available industry-wide.

The Need

Carter Holt Harvey Packaging developed wine sections to meet the specific needs of New Zealand's major wine exporters. Working with the exporters, we identified that the available options (partitions, dividers) were not effective.

Sections needed to be multi-purpose, easy to insert into a case, protect both the bottle and the label, and provide a professional presentation. These findings became our design brief.

The Solution

The result is innovative wine sections that deliver on all requirements.

Dimensions

Our wine section range covers all standard 375ml and 750ml bottles in both 6- and 12-pack configurations, and non-standard bottles as well. Detailed measurements are given on the reverse of the brochure.

We can work with you to customise wine sections to your business.
