

ThermaSure™

The Benefits

1. Holds the cold and keeps product fresh

- Delivers products in the just-caught or fresh-picked state.
- ThermaSure™ locks in the cold and ensures freshness.

2. Waterproof and leakproof

- ThermaSure™ meets all Air New Zealand, Ansett and Qantas regulatory test requirements for water tightness and water absorption.
- Made with carefully selected materials for maximum durability.

3. Cost Effective

- ThermaSure™ reduces inward and outgoing freight costs.
- Saves storage space; delivered dismantled on pallets.
- Easy to assemble as required.

4. Environmentally friendly

- ThermaSure™ is recyclable.

5. Customised to your Business

- The smooth, printable sides of the ThermaSure™ lid allow for branding and advertising.
- Can be printed in up to four colours.

Delivers your product fresh to market, better displayed, for less cost.

The Need

Carter Holt Harvey Packaging developed ThermaSure™ to meet the demand from exporters of fresh, chilled product for an environmentally friendly alternative to polystyrene freight options.

The Solution

ThermaSure™ is a corrugated cardboard case with an innovative interior and sealing system that locks in cold and freshness. Leak-proof and durable, ThermaSure™ will take your product from the pack-house to the retailer in display-ready condition.

ThermaSure™ helps reduce both inward and outward costs through an ingenious space-efficient design. The cases are shipped flat to save warehousing, storage and delivery costs. Freight costs are cut (per kilo) because you can ship seven x 32-litre ThermaSure™ cases in the space of five x 32-litre polystyrene boxes.

In addition, ThermaSure™ is designed to be used as an effective marketing tool. To raise your company profile and assist with advertising, the lid can be printed to meet your requirements.

Dimensions

ThermaSure™ is available in 15, 23, 32 and 40 litres, which are equivalent to 10, 15, 20 and 23 kilograms.

ThermaSure™ can be customised for your business.
